

PROFESSIONAL SUMMARY

"Dynamic and results-driven Data Analyst with expertise in web scraping, data extraction, and market research. Proficient in Python (Pandas, NumPy), SQL, and data pipeline automation for business lead generation. Skilled at transforming raw, unstructured market data into structured, actionable business intelligence to drive high-volume growth."

WORK EXPERIENCE

Data Collection & Verification Associate

03/2026 to 06/2026  
Wyoming, United States

JP IT Staffing (Remote)

- Verified and validated collected information to ensure data integrity.
- Maintained organized records in spreadsheets while updating datasets regularly.
- Utilized Microsoft Excel for data organization and reporting tasks.

PROJECTS

Disaster Relief & NGO Portal | Web Tech, Database

- Developed a full-stack web portal connecting disaster-affected communities with local NGOs to streamline crisis relief coordination. Implemented database-driven architecture to manage real-time victim requests and NGO resource allocation efficiently

Smart Learning Platform (SIH Prototype) | UI/UX, Systems Design

- Designed a low-bandwidth educational platform enabling accessible learning for students in rural and underserved areas. Applied UI/UX and systems design principles to ensure usability under limited connectivity and device constraints.

Market Research & Data Analytics | Python, Web Scraping, Excel

- Built an automated Python web scraper to extract and aggregate B2B lead data across multiple cities for market research. Utilized data cleaning and Excel-based analysis to transform raw scraped data into actionable business intelligence.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (CSE)

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

- Current CGPA: 7.78 Aug 2023 – Present (Expected Graduation: June 2027)

SKILLS

- **Analytics & BI:** Data cleaning, transformation, KPI dashboards, forecasting, trend analysis, statistical modelling, Business Intelligence Reporting
- **Visualization:** Power BI (DAX, Data Modelling, Drill-throughs, Bookmarks, Tooltips), Storytelling with Data
- **Programming and Database:** Python (Pandas, NumPy, Matplotlib), SQL (Joins, CTEs, Window Functions, Triggers)
- **Excel & Google Sheets:** Pivot Tables, Advanced Formulas, Power Query, Dashboard Development, Data Validation

CERTIFICATIONS

- IBM Data Analyst Professional Certificate — Coursera / IBM (2026)
- Web Development Training
- Excel for Data Management

INTERESTS

Digital Media & Content Creation: Scripting and editing high-retention, short-form video content.

Trend Analysis & Scraping: Exploring open-source data extraction tools to study market trends and consumer behavior insights.
